# DID YOU KNOW?

◆ Recycling one six pack of bottles makes enough fiberglass insulation to fill a standard wall cavity.

◆ Stone and Taney County recycled enough glass to fill 25 semi trucks annually. If bottles were laid end-to-end, they would reach from Branson to St. Louis!

## FAQs

rippleglass

### **Do I need to take the labels off?**

Nope. You can leave all the labels on your containers. A lime wedge inside a bottle is okay, too.

### **What kind of glass do you take?**

#### **Can I put window glass in the bin?**

Short Answer: All food and beverage glass is fine.

You keep the lids.

Window glass? Call 337-8566 first.

### **What about Pyrex or old coffee mugs?**

We cannot accept pottery, mirrors, Pyrex, Corning Ware, ceramics, dishes, windshields or ham sandwiches.

Those items contaminate the rest of the glass

Window glass? Call 337-8566 first.

### **Do I have to rinse the containers?**

That would be nice, but it's not essential. You may, however, decide rinsing the containers keeps your home or garage smelling a bit fresher.

### **Can I put glass curbside?**

#### **Or in with the rest of my recycling ?**

No. That's dangerous for the people who process your recycling. They could get cut. Bring your glass to one of the ten drop-off sites instead.
